There are many different types of mbira found throughout Africa. These are called by a variety of names such as sanza, likembe, karimba, kalimba, and matepe, to name a few (Berliner 1993, 9). Technically, the instrument is a plucked idiophone that some call a lamelaphone, the plucked keys referred to as lamellae (singular lamella). In Zimbabwe, where the instrument has reached its highest level of development, it is generally called mbira (Jones 1992, 112).

The particular instrument addressed in this article is known as mbira dzaVadzimu (mbira of the ancestral spirits) or mbira huru (great or big mbira). The full name of the instrument is mbira huru dzaVadzimu (the great mbira of the ancestors) (Berliner 1993, 34). Actually, the title “dzaVadzimu” refers to an instrument used as part of a specific observance of ancestral worship, so it is probably more appropriate to call the instrument mbira huru when referring to its use outside of a religious context. I have continued to call it mbira dzaVadzimu because it is the name most commonly used in the United States.

This mbira consists of 22 to 25 keys affixed to a tray-shaped wooden soundboard. Buzzers (machachara), made from shells or bottle caps, are attached to the soundboard to create an additional sound in sympathetic resonance to the sound of the keys (Photo 1). The instrument is often placed inside a large gourd resonator (deze) to amplify and resonate the sound. Buzzers are often attached to the outer rim of the gourd as well (Photo 2). Some players have now dispensed with the gourd resonators altogether, relying instead on electronic amplification via contact microphones or ambient miking.

**HOLDING THE INSTRUMENT**

The instrument is held in both hands, supported by the fingertips. The right-hand little finger is inserted in the finger hole from above (Photo 3). Since the right hand strokes the keys with the thumb and forefinger, the ring and middle fingers support the weight of the instrument from underneath the soundboard (Photo 4).

Likewise, since the left-hand keys are stroked with the thumb alone, the four remaining fingers support the instrument from underneath (Photo 5). Care must be taken to support the left side of the instrument with the tips of the fingers, as the thumb must often cover great distances and thus requires maximum flexibility.

Some players use a strap around the...
neck to provide further support and to allow increased flexibility for the hands (Photo 6). On the right hand, the thumb strokes the first three (and occasionally the fourth) keys with a downward motion, while the index finger strokes the remaining keys (4 through 10) with an upward motion from underneath (Photo 7).

Maximum comfort is assured if the nails of both thumbs and the right index finger are allowed to grow before one begins to play. Various products available to classical guitarists may be of help to the mbira player. One such product, called "aLaska Pik," is especially helpful as it fits underneath the existing nail and adds length to the striking surface. Products such as these are available in most music stores. In addition, emery boards are essential to maintaining the nails and keeping them strong and well-shaped.

TUNING SYSTEMS

While it is beyond the scope of this article to discuss specifics of tuning and tuning systems for mbira, a few general observations are in order. The tuning of the mbira dzaVadzimu is heptatonic (based on a seven-tone scale), but tuning systems can vary widely. In very general terms, the most common tuning is similar to a Western major scale with the seventh scale degree flatted (lowered one half-step). This is generally known as "regular," "standard" or "Nyamaropa" tuning. There are also instruments tuned to the major scale with a raised seventh degree (called Dambatsoko —presumably after the Zimbabwean village of the same name). An instrument tuned to a phrygian scale (natural minor scale with lowered second degree) is said to be in gandanga tuning.

Regardless of the tuning system, the layout of the keys remains the same. Diagram 1 shows the layout of keys for a 24-note instrument. Letter names are used to indicate relative pitches. The note G is used as the "tonic" note in this particular example. Accidentals are intentionally omitted, so the example as written reflects "regular" tuning. One would simply add accidentals to the appropriate scale degrees to reflect any of the other tuning systems.

Octaves on the left-hand side of the instrument are indicated with arrows (Diagram 1). Tunes can be centered on either the tonic note (G in Diagram 1) or on the fourth scale degree (C in Diagram 1). Mbira can be pitched in any key, so the transcriptions found here use numbers to indicate specific lamellae (rather than pitches) in order to make them applicable to all instruments.

SHONA MUSICAL STYLE

Shona mbira music is built on a melodic and harmonic structure that is cyclic in nature. Each cycle is divisible into four sections of twelve pulses each, although a few tunes use nine- or eight-pulse structures. Each cycle is referred to as a chara, meaning "version" (literally "fingering" or "thumbs," plural zvara) (A. Tracey 1970A, 1). Each tune has its basic version and several somewhat standardized variations. Accomplished players have mastered the "stock" versions and are able to improvise new zvara at will. It should be a goal of each performer to eventually move beyond the standardized zvara and toward the art of creative improvisation.

Mbira music is further characterized by a polyrhythmic style predicated on an interlocking technique (known in Western musical terminology as hocket) through which complex rhythmic and melodic patterns emerge. Since these resultant patterns are dependent on the perception of the listener, the performer must take care not to move too quickly from variation to variation.

The interlocking principle is multiplied when two (or more) instruments play together. One instrument plays the basic pattern known as kushaura ("to lead" or "to start") while another plays a complementary pattern called kutsinhira ("to follow") (Berliner 1993, 73). The two parts may vary rhythmically, or they may be essentially identical, with the kutsinhira staggered one pulse behind the kushaura.

NOTATION

The transcriptions in this article are written in a tablature notation based on the numbering of mbira keys starting at the center of the instrument and moving outward (Diagram 2). Separate lines are indicated for the right index finger (RI), right...
thumb (RT), upper-left manual (UL) and lower-left manual (LL). Numbers appearing on these lines correspond to the keys on the instrument as illustrated in Diagram 2. Numbers in parentheses indicate optional keys to be stroked at the performer’s discretion. The dotted line moving horizontally between the RT and UL lines serves to visually separate the left and right sides of the mbira.

Numbers at the top of each of the four sections in a chara refer to the division of time into pulses. These pulse numbers serve as guides to deciphering the rhythmic component of the pieces. As such, they are not really counted, but only serve as a visual point of reference. The four sectional divisions in each chara are designated by Roman numerals. The cyclic nature of this music makes it possible to start or end in any section. The symbol (+) indicates some commonly-used alternate starting points (shaura).

In order to give a more complete aural picture of the sounds represented by the tablature notation, each transcription is preceded by the tune’s basic version in conventional Western notation. The right and left hands are indicated by note-stem direction (stems up = right hand, stems down = left hand). Some may find it helpful to refer to this notation in order to get a better grasp of rhythmic relationships.

The transcriptions are not intended to be note-for-note renditions of particular performances, but to show some of the basic zvara by which the pieces are identified and to give some examples of variation techniques applied to the basic versions. Once the basic patterns are learned, it is up to the performer to use them as the foundation for flexible improvisations.

Practice the patterns with each hand separately at first, starting with the left hand, then moving to the right before combining them. The notation facilitates this type of practice with its visual separation of parts. Start slowly and work one section at a time to ensure accuracy. Once an entire chara has been learned, it should be repeated several times and gradually accelerated to performance tempo. When all the variations have been learned, it is good practice to play them in order from first to last (repeating each as desired), then reversing the order, ending with the basic version.

It should be reiterated that mbira tunes do not always start and stop in the same part of the cycle. It is a common to fade in volume at the end of a performance, blurring any distinction of exactly where the piece actually ends.
Kariga Mombe, meaning “taking the bull by the horns,” is often among the first pieces a student will learn on mbira (Berliner 1993, 151). Harmonically, the piece is one of many derived from Nyamaropa, arguably the oldest work in the dzavadzimu repertory. The piece is characterized by the si-
multaneous sounding of both the upper and middle registers (primarily without the use of the LL keys) in a series of regular pulses. The regularity of the rhythm and limited range make the piece ideally suited for beginners. There are several appropriate starting points for Kariga Mombe, and the tune will take on an entirely different harmonic character with each version, depending on which section begins the piece.

The version presented here is similar to one recorded by Fabio Chivhanda (Chivhanda, Shungu Dzangu). Starting in section III renders a version similar to Paul Berliner’s transcription found in The Soul of Mbira (Berliner 1993, 79).
Nyamaropa (“meat and blood”) is generally considered among the most ancient of mbira compositions. Some musicians say it was the first piece composed for the instrument (Berliner 1993, 77). Andrew Tracey calls it the “big song” for mbira dzaVadzimu (A. Tracey 1970A, 13), probably because it is the prototype for so many other mbira pieces such as Kariga Mombe and Mahororo, as well as several others (Berliner 1993, 77-83). Possibly originating as a war song “to raise emotions before a battle” (Ephat Mujuru from Berliner 1993, 42), the piece is now considered a hunting song, its title suggesting the scene following a successful hunt (Kauffman 1970, 139).

Two versions of Nyamaropa are given here. Nyamaropa I presents the standard kushaura (leading) part, while Nyamaropa II presents the kutsinhira (following) part. Both parts contain the same basic rhythmic relationships (hands moving in a “together-left-right-left-together” configuration), but the beat is heard as occurring on different pulses from one part to another. The kushaura player must hear the “downbeat” as occurring on the first “together” of the configuration, while the kutsinhira player hears it on the first “left.” In other words, the first “together” in the kutsinhira part is heard as a “pickup” (graphically represented by a dotted vertical line in the transcription of Nyamaropa II). This relationship between the two parts makes the interlocking of the melodic and rhythmic lines possible in traditional mbira ensemble performance. Indeed, this interlock can be said to represent the essence of mbira music.

One should become thoroughly familiar with the kushaura part (Nyamaropa I) before moving on to the kutsinhira part (Nyamaropa II). Generally speaking, the kushaura part will tend toward less variation than the kutsinhira, but it is the kushaura part that is considered to embody the basic identity of the tune (Berliner 1993, 73).

The versions here correspond to those presented by Andrew Tracey (A. Tracey 1970A, 13—18) and Paul Berliner (Berliner 1993, 76).

**PERCUSSIVE NOTES**

**AUGUST 1997**
1998 Percussive Arts Society
25th Annual Percussion Composition Contest

Purpose: The Percussive Arts Society sponsors an annual competition to encourage and reward those who create music for percussion instruments and to increase the number of quality compositions written for percussion.

1998 CATEGORIES:
Category I: Solo Timpani (four drums)
   First Place: $1,000 plus publication by Innovative Percussion Inc.
   Second Place: $300
   Third Place: $200

Category II: Small Percussion Ensemble (3-5 players)
   First Place: $1,000 plus publication by Meredith Music Publications
   Second Place: $300
   Third Place: $200

Efforts will be made to arrange performances of the winning compositions at a future Percussive Arts Society International Convention or other PAS sponsored events.

ELIGIBILITY AND PROCEDURES: Previously commissioned or published works may not be entered.

Compositions should be between 5 and 10 minutes in length. Total duration of piece should be stated on manuscript. Compositions must be original (no transcriptions or arrangements) and should be in the “Concert” rather than “Pop” style.

Composer should send 4 copies of the score. Clean, neat manuscript is required. Composer’s name may appear, but it will be deleted for judging purposes. Cassette tapes may be submitted in addition to scores but are not required. All entry copies become property of PAS.

The difficulty of the composition is left to the discretion of the composer. High artistic goals should be coupled with realistic demands to allow for performance at the university level. Instrumental demands should also be limited to those commonly found at the university level.

APPLICATION FEE: $25 per composition (non-refundable) should be enclosed with each entry. Make checks payable to the Percussive Arts Society.

DEADLINE: All materials (application fee, application form and manuscripts) must be postmarked by April 1, 1998. For further information and complete details, contact: PAS, P.O. Box 25, Lawton, OK 73502-0025, (405) 353-1455.

Nhemamusasa (“temporary shelter”) is another tune once associated with war that is now considered a hunting song. The title has to do with building a temporary shelter, called a musasa, which soldiers or hunters could use while away from home (Berliner 1993, 42).

Nhemamusasa differs from Kariga Mombe and Nyamaropa most obviously in its tonal center, a fourth above the lowest note on the instrument. Given an instrument pitched in G, Nhemamusasa would have a tonal center of C. The harmonic progression found in Nhemamusasa is identical to that of Nyamaropa and its derivative pieces, but with a higher tonal center (Berliner 1993, 78).

As with all mbira pieces, there are many starting points for a tune like Nhemamusasa, and the piece can take on an entirely different sound depending on where in the harmonic cycle the player may choose to start. One particularly interesting starting point for Nhemamusasa can be found on the fifth pulse of section III as it appears in the transcription provided here. Starting at this point in the cycle (beginning with key UL 5) renders a basic melody in European solfege of fa-mi-re, fa-mi-do, mi-re-do, mi-mi-do. This can be compared with the tune starting at the beginning of section I, which renders do-mi-re, do-mi-mi, do-fa-mi, re-fa-mi, or starting at the beginning of section II, rendering do-mi-mi, do-fa-mi, re-fa-mi, do-mi-re.

Listening to any mbira performance, one may find that the perception of tonal center or starting point may shift, resulting in an altered awareness of harmony, melody and rhythm. This is possibly related to a phenomenon that Dumisani Maraire calls “present but not obvious lines” created by the combination of interlocking patterns, cross harmonies, overtones or the interweaving of other, unintended sounds. According to Maraire: “When everybody...hears these ‘present but not obvious lines,’ they are beginning to cross over. If two or three people hear the same line, this means they are following the same path. If they realize they are hearing the same underlying line, the more stimulation and closeness they will have.” (Maraire 1984)

It is the altered perception of musical elements that makes mbira music so versatile, but it is often incumbent on the listener to create the perception (Patricia Sandler 1994, personal conversation). Mbira music is predicated on economy of means, so with regard to improvised variations on the part of the player, a little truly goes a long way.

The version presented here corresponds most closely to transcriptions by Paul Berliner (Berliner 1993, 80) and Andrew Tracey (A. Tracey 1970A, 19–20).

CONCLUSION
Three of the most basic pieces from the repertoire of the mbira dzaVadzimu are presented here in transcription. Each includes a standard version and two somewhat typical variations. These represent only a glimpse of the mbira repertoire, but should be representative enough to get one started on the instrument.

Locating a good instrument and an experienced teacher is highly recommended. A good source of information can be found in Dandemutande magazine, a periodical devoted to Shona music. For information about Dandemutande, contact Paul Novitski, 1711 East Spruce Street, Seattle WA 98122-5728 USA; phone (206) 323-6592, fax (206) 329-9355; e-mail dandemutan@aol.com.

GLOSSARY OF SHONA TERMS
Pronunciation note: In Shona, the consonant “r” is rolled, like a soft “d.”

Chara (CHA-rah)—Version. Literally “fingers” or “thumbs.” Plural zvara.

Dambatsoko (Dahm-baht-SEH-koh)—Tuning system similar to a Western major scale with lowered seventh.

Deze (DAY-zee)—Gourd resonator.

Gandanga (gaHN-DAHN-gah)—Tuning system similar to a Western phrygian scale (natural minor with lowered second).

Hosho (HO-sho)—Maraca-like rattle used in pairs to provide rhythmic accompaniment to mbira performances.

Kariga Mombe (kah-REE-gah MOHM-bay)—“Taking the bull by the horns.” Mbira composition derived from Nyamaropa.

Kushaura (koo-sha-OO-ra)—To lead or to start. The basic tune in an mbira ensemble.

Kutsinhira (koot-sin-HEE-ra)—To follow. To add an interlocking part in an mbira ensemble.

Machachara (mah-cha-CHA-rah)—Buzzers, usually bottle caps or snail shells, attached to the mbira or gourd resonator.

Mbira dzaVadzimu (ehm-BEE-rah zah-vahd-ZEE-moo)—Mbira of the ancestors.

Mbira huru (ehm-BEE-rah HOO-roo)—Great or large mbira.

Nhemamusasa (nay-mom-oO-SAHS-a)—“Temporary shelter.” One of the oldest compositions for mbira dzaVadzimu.

Nyamaropa (nee-yahm-ah-RO-pah)—“Meat and blood.” One of the oldest compositions for mbira dzaVadzimu.

Nyamaropa tuning—Standard tuning system for mbira dzaVadzimu, similar to a Western major scale with lowered seventh.

Shaura (sha-OO-ra)—Starting point.

Zvara (ZVAH-ra)—Versions. Plural of chara.

Each of these six scholarships offer one year of free PAS membership, free PASIC ’97 registration, one free ticket to the Hall of Fame Banquet, one free official PASIC ’97 souvenir t-shirt, and $300 toward the cost of transportation or lodging (checks will be presented at the Hall of Fame Banquet).

**REGIONAL PASIC SCHOLARSHIPS AND SPONSORING ORGANIZATIONS**

- **Pro-Mark/Texas PAS Student Scholarships**
  - Lauren Vogel Weiss
  - 8534 Coppertowne Lane
  - Dallas, TX 75243

  Three scholarships will be offered by the Texas State Chapter. One will be for Texas high school students; the second will be for Texas college students; the third scholarship is sponsored by Pro-Mark for either Texas high school or college students. Each scholarship offers one year of free PAS membership, free PASIC ’97 registration, one free ticket to the Hall of Fame Banquet, one free official PASIC ’97 souvenir T-shirt, and $300 toward the cost of transportation or lodging. This scholarship is limited to students attending school in Texas only, and all other rules/restrictions apply. You must be a current member of PAS.

- **Canadian Student Scholarship**
  - Sabian Scholarship Committee
  - c/o PASIC ’97
  - P.O. Box 25
  - Lawton, OK 73502-0025

  Sponsored by Sabian Ltd., this scholarship offers one year of free PAS membership, free nights free lodging in the convention hotel, free PASIC ’97 registration, one free ticket to the Hall of Fame Banquet, one free official PASIC ’97 souvenir T-shirt, and transportation to the PASIC ’97 location—total not to exceed $1,000 Canadian. This scholarship is limited to a Canadian music student (percussion major) who is a full-time grade 12/13 high school student or a first/second year university student.
